

## IN THE CLAIMS

The following is a complete listing of the claims in this application, reflects all changes currently being made to the claims, and replaces all earlier versions and all earlier listings of the claims:

1. (Currently Amended) A method for facilitating interaction between a consumer and a merchant, said method comprising:

receiving offer information from said merchant via a broadcast that reaches a plurality of potential consumers, wherein said offer information relates to a product;

retrieving consumer preference information from a database resident on equipment associated with the consumer;

customizing said offer information received from the merchant via the broadcast with the consumer preference information to create an amended offer;

transmitting said amended offer to a display for viewing by said consumer,  
the amended offer specifying a method of acceptance;

receiving an acceptance, from said consumer, wherein said acceptance is associated with said amended offer and said acceptance includes a security feature;

amending acceptance with consumer payment information and identification information to create an amended acceptance; and transmitting said amended acceptance to said merchant.

2. (Original) The method of claim 1, wherein said transmitting said amended offer to a display includes transmitting via at least one of television programming and web broadcast.

3. (Original) The method of claim 1, wherein said receiving offer information includes receiving offer information relating to a product which includes at least one of a good, item, service, and soft good.

4. (Original) The method of claim 1, wherein said receiving an acceptance from said consumer includes receiving an acceptance via at least one of a remote control, electronic pen, telephone, automatic dialing device, microphone, pager, radio frequency device, personal digital assistant, smart card, DVR, PVR, and simulated button.

5. (Original) The method of claim 1, wherein said acceptance includes a security feature including at least one of authentication, embedded certificates, consumer ID and password, identifier, data encryption, digital signature, secure file structures, and trusted third party downloads.

6. (Original) The method of claim 1, further including a registration process.

7. (Original) The method of claim 1, further including at least one of authenticating the consumer, restricting access to certain portions of said method and managing consumer identities.

8. (Original) The method of claim 1, further comprising analysis of attributes of said consumer to substantially predict offer content and context.

9. (Original) The method of claim 1, wherein said amending acceptance with consumer payment information includes amending acceptance with at least one of consumer loyalty point information, authorization from an issuer, authorization from said system, security or wallet server authorization, consumer authentication and single use account number information.

10. (Original) The method of claim 1, further comprising developing at least one of a consumer transaction database and an offer evaluation database.

11. (Original) The method of claim 1, wherein said transmitting said amended acceptance to said merchant includes at least one of authenticating and authorizing a transaction.

12. (Currently Amended) An interface device configured to facilitate interaction between a consumer and a merchant, the interface device comprising:

a processor for processing digital data;

a memory coupled to said processor for storing digital data;  
a device for accepting input of digital data; and  
an application program stored in said memory and accessible by said  
processor for directing processing of digital data by said processor, [[;]]

wherein said interface device is [[further]] configured to implement the  
steps of: [[facilitate:]]

receiving offer information from said merchant via a  
broadcast that reaches a plurality of potential consumers, wherein said offer information  
relates to a product;

retrieving consumer preference information from the  
memory;

customizing said offer information received from the  
merchant via the broadcast with the consumer preference information to create an amended  
offer from said merchant;

transmitting said amended offer to a display for viewing by  
said consumer, the amended offer specifying a method of acceptance;

receiving an acceptance, from said consumer; wherein said  
acceptance is associated with said amended offer and said acceptance includes a security  
feature;

amending acceptance with consumer payment information to  
create an amended acceptance; and

transmitting said amended acceptance to said merchant.

13. (Original) The interface device of claim 12, further comprising at least one of an offer retrieval engine, offer storage database, maintenance engine, amended offer engine, broadcast device, billing engine, authentication module, event tracker and offer evaluation device.
